Banish Catarrh

Breathe Hyomei for Two Minutes and Stuffed up Head Will Vanish

If you want to get relief from catarrh, cold in the head, or from an irritating cough in the shortest time, breathe Hyomei (pronounce it High-o-me). It will clean out your head in two minutes and allow you to breathe freely awake or asleep.

Hyomei will cure a cold in one day; it will relieve you of disgusting sniffles, hawking, spitting and offensive breath in a week.

Hyomei is made chiefly from eucalyptol, a soothing, healing, germ-killing antiseptic, that comes from the eucalyptus forests of inland Australia, where catarrh, asthma and consumption were never known to exist.

Hyomei is pleasant and easy to breathe. Just pour a few drops into the hard rubber inhaler, use as directed and cure is almost certain.

A complete Hyomei outfit, including inhaler and one bottle of Hyomei, costs only \$1.00 at druggists everywhere and at Tragle's. If you already own an inhaler you can get an extra bottle of Hyomei at druggists for only 50c.

The Social Side of Washington

(Special to The Times-Dispatch.) Washington, D. C., July 2.—Absences from the White House, which patriotic Americans everywhere will be celebrating to-morrow, while the national capital is in the hands of the nation's legislators, is permeated with that peculiar form of loneliness which follows in the wake of a long session of Congress. The annual scattering of congressional households to the four corners of the Union is more marked than ever this year, because so many departures were coincident with those of Fourth-of-July pleasure-takers. There are, however, always enough of those whose official duties keep them more or less permanently in the city to form a creditable group.

Not many of these, however, are mark even the warmest days and add zest to the midsummer life of other stay-at-homes.

The gloom which settled over the White House after the departure of Mr. and Mrs. Roosevelt, and the dispersal which the President invited his new secretary, Mr. Norton, to be his guest there for a few days prior to the departure of the latter, was broken by the coming of Mr. and Mrs. Squire, of the former Massachusetts, is disturbed now only by the coming and going of a few strangers—all interesting folk whom Washington delights to welcome and without whom the city would lack much of its cosmopolitan air.

The Vice-President's mansion, a personal property, and therefore less of a Mecca for sightseers, has likewise done its summer's gloomy appearance. There, however, the cheerful light of the house to a condition of drawn shades and barred doors was not so marked as here, owing to the illness of Mrs. Sherman, which caused a gradual cessation of the hospitalities for which the Vice-President and his happy wife were famous.

Next in official importance is the home of the Secretary of State, from which both host and hostess will be gone for some time. Indeed, so greatly does Mrs. Knox enjoy the freedom of Valley Forge Farm that she hopes not to return to the city until the first of autumn, and the early approach of winter. In the interim she has planned to entertain a few friends at the home, and to make the latter will be her daughter, pleasantly remembered here as Rebecca Knox, who was the youngest of whom to be accompanied by his bride.

High and exalted as the position of the Secretary's family last winter temporarily threw the Knox clan into a state of nervous prostration, from which it was finally rescued by a mother's love and a father's judgment.

Secretary of War and Mrs. Dickinson, who are entertaining a party on a tour of the world, will spend Independence Day at Honolulu, where the Secretary will be the guest of the Hawaiian monarch. The party will include the Secretary's wife, Mrs. Dickinson, and their daughter, Mrs. Dickinson, who is the wife of the Hawaiian monarch.

Benefits of the Traveling Library System

That the travelling library system of the State Library is conferring great benefits upon the people of Virginia is certain. This fact is proved by the numerous testimonials of the fine work these collections are doing in reaching the heads of the people. Following words of commendation, received from different sections of the State, will show that these books are indispensable to those communities, associations, study clubs, public schools and, in fact, to all institutions which need good literature and cannot afford to purchase it.

Says an enthusiastic school teacher of Culpeper county: "I think these travelling libraries mean a great deal to the schools. I hope I can always have one in my school. Do you ever send two to a school? Many thanks for your kindness to me."

Another teacher, in charge of a school in Pittsylvania county, sends the following comment: "The library has been very helpful in the school. The people all seem anxious for one of the community libraries to read during the summer months. You will please let me know when the next collection will be sent to the county, so that I may secure a travelling library for the community. Please let me hear from you as early as is convenient, as we are very anxious for the library."

One of the prominent high schools of Franklin county sends the following word of praise: "I am returning to the library the books you so kindly sent for the use of my school. The children have thoroughly enjoyed these books, and it has been a great treat for most of them. I thank you very much for your kindness."

An appreciative teacher of Botetourt county speaks thus of her library: "I wish to thank you very much for the library which I have secured. It is a good deal of good in the community of our school. I regret that more people could not read the books, as they would have done if I could have gotten them earlier in the season. I realize more and more that the great need of the people among whom I teach is general information, and I think the books in this library are calculated to meet the need very well. The people here are appallingly ignorant of the world about them, yet read eagerly. They can get anything but cultivated in them they will get something to read. Children, especially, in my school seemed to take the greatest interest in the library, and it seems to me if the younger ones can be trained to the appreciation of books a big work is done."

A librarian of a travelling library station in Buckingham county sends the following remarks about the work of the books supplied from the Travelling Library Department: "The people have enjoyed the books very much. They are of great benefit to the community, and I think they are beneficial and improving to the community. I have enjoyed the reading myself. I hope you can send us another."

And, finally, the librarian of a special collection of books sent to a town in the western part of the State writes these words after using the books: "We found the books very helpful, instructive, enjoyable and well selected. They were read with much interest, and the beautiful illustrations eagerly enjoyed. We feel that the State Library with the present arrangement of distributing books is a great factor for good, especially in small towns where there are few libraries. We thank you collectively and individually for the books. The State Library deserves praise without stint."

Danderine

GROWS HAIR and we can PROVE IT!

A lady from Minnesota writes: As a result of using Danderine, my hair is close to five feet in length.

Beautiful Hair at Small Cost

HAIR troubles, like many other diseases, have been wrongly diagnosed and altogether misunderstood. The hair itself is not the thing to be treated, for the reason that it is simply a product of the scalp and wholly dependent upon its action. The scalp is the very soil in which the hair is produced, nurtured and grows, and it alone should receive the attention if results are to be expected. It would do no earthly good to treat the stem of a plant with a view of making it grow and become more beautiful—the soil in which the plant grows must be attended to. Therefore, the scalp in which the hair grows must receive the attention if you are to expect it to grow and become more beautiful.

Loss of hair is caused by the scalp drying up, by losing its supply of moisture or nutrients, or by an accumulation of dirt on the scalp which causes the hair to fall out or even a true disease due under similar conditions.

The natural thing to do in either case, is to feed and replenish the soil or scalp as the case may be, and your crop will grow and multiply as nature intended it should.

Known to Danderine has a most wonderful effect upon the hair and tissues of the scalp. It is the only remedy for the hair ever discovered which is similar to the natural hair foods or liquids of the scalp.

It penetrates the pores quickly and the hair soon shows the effects of its wonderfully exhilarating effect upon the hair and tissues of the scalp. It is the only remedy for the hair ever discovered which is similar to the natural hair foods or liquids of the scalp.

One 2-cent bottle is enough to convince you of its great worth as a hair growing and hair beautifying remedy—try it and see for yourself.
